SUMMARY

A highly motivated Full Stack Developer with a Bachelor of Engineering (S.T.) in Informatics Engineering from UIN Maulana Malik Ibrahim Malang. Experienced in designing and developing scalable web applications using Go (Fiber), React.js, Node.js, Express.js, PostgreSQL, and MongoDB, following modern software engineering practices.

Skilled in building RESTful APIs, implementing JWT authentication, developing responsive user interfaces, designing relational databases, integrating third-party services, and deploying applications on Linux VPS environments. Proficient in using modern development tools including Git, GitHub, Docker (basic), Postman, Swagger, and Figma.

Strong analytical thinking, problem-solving, collaboration, and communication skills with the ability to quickly adapt to new technologies. Passionate about creating maintainable, high-performance applications and continuously improving technical expertise.

EXPERIENCE

Dinas Pendidikan dan Kebudayaan Kota Cilegon - Cilegon, Indonesia

2024

Designing Web Interface (Internship)

- Developed the complete user interface using semantic HTML5, modular CSS3, and Vanilla JavaScript, ensuring optimal performance and maintainability.
- Implemented responsive design across the entire website utilizing Tailwind CSS, achieving cross-device compatibility and optimal viewing experience.
- Optimized code structure and assets, resulting in a measurable improvement in page load speed and adherence to W3C validation standards..
- Conducted rigorous cross-browser testing and debugged front-end logic to eliminate rendering issues and ensure functional consistency across all major browsers.

EDUCATIONS

Universitas Islam Negeri Malang - Malang, Indonesia

2021 - 2025

Bachelor Degree in Informatics Engineering, (GPA: 3.75/4.00)

- Thesis: Sistem Pendukung Keputusan Penentuan Prioritas Pengadaan Sarana dan Prasarana pada Satuan Pendidikan di Kota Cilegon menggunakan Metode MOORA

PROJECT

Full-Stack Go & React.js Project Management System ([demo video](#)) ([source code](#))

A full-stack web application designed to manage projects, tasks, and team collaboration, developed using Go (Fiber) for the backend and React.js for the frontend. The application follows a RESTful API architecture and supports Kanban-style project management with authentication, role-based access, and real-time workflow organization.

Key implementations include Go Fiber, GORM ORM, and PostgreSQL for backend services; React.js 19, React Router, Material UI, React Hook Form, and Yup for building a responsive and interactive user interface. Authentication and authorization were implemented using JWT, while drag-and-drop functionality was built with Dnd Kit to provide an intuitive Kanban board experience. Additional features include project dashboards with data visualization using Recharts, file attachment management, pagination, search, form validation, and deployment on a Linux VPS using Nginx, Systemd, and PM2 for production-ready hosting.

Technologies: Go, Fiber, GORM, PostgreSQL, React.js, React Router, Material UI, React Hook Form, Yup, JWT, Dnd Kit, Axios, Recharts, Nginx, Ubuntu VPS, Git, GitHub.

Event Management Web Application ([demo](#)) ([source code](#))

A full-stack web application for managing events, built using the MERN Stack (MongoDB, Express.js, React.js, Node.js) through a project-based learning approach with Scrum methodology. The application was developed from scratch to deployment-ready stage, following current industry standards.

Key implementations include React JS 19 and Next JS 15 for a modern, responsive frontend; Tailwind CSS and Hero UI for consistent UI components; and Tanstack React Query with Axios for efficient data fetching. Backend services were built with Express.js and MongoDB (Mongoose ODM), secured using JWT-based authentication and Next Auth. Additional integrations include Midtrans as a payment gateway, Cloudinary for cloud-based media storage, Nodemailer with Zoho SMTP for transactional email, and Swagger for structured API documentation. Form and data validation were handled using React Hook Form and Yup.

Prestige Palace Residence Web Application ([demo](#)) ([source code](#))

A responsive multi-page property website designed to showcase modern residential housing, facilities, house types, company information, blog content, and contact services.

Key implementations include responsive navigation, property showcases, house type comparison, facility sections, company profile, contact form, FAQ accordion, Google Maps integration, blog cards, and interactive call-to-action sections. Animations and interactions were implemented using Vanilla JavaScript, GSAP, and AOS.

Bootstrap 5.3.3 was used for responsive layouts and UI components, with custom CSS for consistent typography, colors, spacing, navigation, buttons, cards, and footer across all pages.

Technologies: HTML5, CSS3, JavaScript, Bootstrap 5.3.3, GSAP, AOS, Font Awesome, Google Fonts, Google Maps, Git, GitHub.

Decision Support System – Dinas Pendidikan Kota Cilegon

A web-based application designed to assist the Education Office of Cilegon in determining priority needs for educational facilities and infrastructure. The system implements the MOORA method for multicriteria decision-making, providing accurate prioritization results. Features include user-friendly web interfaces and structured reporting to support effective decision-making.

SIPERBANG - Regional Office Information Web Portal Ministry of Religious Affairs, Indonesia

A web-based platform designed to streamline access to data and information about regional offices across all provinces in Indonesia.

ADDITIONAL

Hard Skills : Golang, React.Js, Node.Js, Express.js, PostgreSQL, MongoDB, Postman, Tailwind CSS, Bootstrap, JavaScript (Vanilla JS/ES6+), HTML5 (Semantic Markup), CSS3 (Modular CSS), System Coordination & Monitoring, Figma, Programming, Microsoft Word, Microsoft Excel, Microsoft Power Point

Soft Skill : Attitude & Growth, Adaptive, Communication & Professionalism, Collaboration & Team Dynamics, Discipline, Time Management, Team work, Coordination & Management

Other Certifications : Frontend – ReactJS by MySkill, Frontend – VueJS by MySkill, Frontend – JavaScript by MySkill, Frontend – CSS by MySkill, Frontend – HTML by MySkill, Belajar Dasar Pemrograman Web by Dicoding Indonesia, Bootstrap 5 – Membuat Website Landing Page by Skilvul, CSS (Basic) Certificate by HackerRank, React Dasar by Skilvul, Machine Learning with Python by Cognitive Class, python 101 for Data Science by Cognitive Class
